

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior version, and listings, of claims in the application:

Listing of Claims:

1-20. (Canceled)

21. (Previously Presented) A method for filtering on-line service information provided through a management portal to a customer of customized network services provided by resources of a service provider network, comprising:

applying to said service provider network a security filter definable by service provider and not the customer, said security filter corresponding to the customer and specifying the network resources of a partitioned network allocated to that customer, the partitioned network including at least a portion of said service provider network;

applying a display filter to resources of the service provider network not excluded by said security filter, said display filter specifying network resources for which the on-line service information is desired by the customer; and

executing at least one management information module to generate a portal display of on-line service information, wherein said at least one management information module operates on only those network resources of said service provider network which have not been excluded by said security filter and said display filter.

22. (Previously Presented) The method of claim 21, wherein applying said security filter comprises:

applying a customer sub-filter to provide an association of said corresponding customer and said network resources contained in said partitioned network allocated to the customer.

23. (Previously Presented) The method of claim 21, wherein said at least one management information module comprises:

an alarm module configured to display information regarding alarm conditions occurring in said non-excluded network resources.
